Louis JOLY

Skills

- Analyze specific needs for development.
- Design the architecture of a system.
- Develop gameplay, plugins and AI.

Analyze, exploit, and structure data.
Create technical documentation.
Test performance of software, game.

Experience

AI and Automation Developer

Freelance
2024 - Now

- ★ Implement a RAG (Retrieval Augmented Generation).
- ★ Use a LLM (Large Language Model) for analysis.
- ★ Design a GUI (Graphical User Interface).

Lead Programmer

Objectif 3D
2022 - 2024

- ★ Supervise the programming team.
- ★ Collaborate with other teams.
- ★ Manage the architecture, ensure execution, and maintain quality.
- ★ Improve, debug, and profile existing code.

Education

Bachelor programmer

Objectif 3D
2022 - 2024

Head of class

- ❖ Master C++/C# languages and AI design (FSM/Behavior Tree).
- ❖ Master pathfinding algorithms (Dijkstra/A*).
- ❖ Use best practices (Smart Pointer/Template).
- ❖ Knowledge of production software (UE5/Unity/Perforce/Trello/UML).

Engineering school

UPSSITECH
2019 - 2022

- ❖ Manage complex projects using agile methods.
- ❖ Master mathematics, physics, and engineering science.
- ❖ Rigorous investigation and problem solving.
- ❖ Analyze complex systems and implement technological solutions.

Soft skills

- Interpersonal Communications
- Learning Orientation
- Mobilization Skills
- Rigor and Perseverance
